The first AutoCAD was an add-on to a 1982 Atari computer. The add-on was called the Computer Assisted Design (CAD) System. It had the ability to produce architectural drawings and was used mainly to design buildings, bridges, and other large structures. The first AutoCAD software was released in 1982. When the first version of AutoCAD was released, the computer graphics (CG) chip had not been released. Before 1982, there were no 3D computer games available and there were no 3D computer graphics (CG) applications. In 1982, Atari introduced the Atari 8-bit series computers that were sold as the Atari 800, Atari 800XL, Atari XL, Atari 800XL, Atari 800XM, and Atari XLXE, a machine based on the 64-bit AT&T 6800 CPU. The first version of AutoCAD was called the Computer Assisted Design (CAD) System for the Atari 800 XL and was developed by the Autodesk design team. Initially AutoCAD was developed as a CAD program for the Atari 8-bit series, the Atari XL, and the Atari XLXE. In the fall of 1982, Atari was sold to Warner Communications and Warner published software including Autodesk CAD. In 1983 the Autodesk (formerly Atari) brand name was dropped. In 1986, Atari became Autodesk. In 1986, the Atari 800XL, Atari XL, and Atari XLXE were discontinued. The Atari XL and Atari XLXE were the first games that featured 3D graphics (3D games). The first 3D game was Gorilla Maze. In 1984, a later version of Gorilla Maze featured a 3D front end for AutoCAD. In 1985, the Atari 800XL and the Atari XLXE were discontinued, and a newer model was released called the Atari XE.

The Atari XE was a portable and wireless computer, and ran on either AAA batteries or a rechargeable NiCad battery pack. The Atari XE was discontinued in 1991. In 1987, the XE was renamed to the Atari 8-bit series. Atari 8-bit was a new version of the Atari 8-bit family that combined the Atari 800 with the SEGA/Atari 2600 game console. In 1991, Atari 800XL was discontinued, and it was replaced by Atari 800XL2. The Atari 800XL2 was a smaller, lighter, faster, and cheaper model of the Atari

System Requirements For AutoCAD:

A machine with a decent GPU can be used with this mod. The mod will run fine on a 300 to 400 series GPU, but expect laggy performance. An Intel i7 is recommended for best performance. Complex transformations and materials can cause lag. This is unavoidable. However, lag is not a problem on a reasonably-powered system, as long as you have at least 8GB of RAM. For example, the mod will run smoothly at 1440p on a machine with an i5-4590. But on a machine with 8GB or more
