## What's New In?

Designed as a protocol handler, the Windows Desktop Search Thunderbird/Mozilla/Eudora Mail Add-in gives Windows Desktop Search the ability to search and index the content of your Eudora, Thunderbird or Mozilla/Netscape mailboxes. Requirements:  Windows Desktop Search 2.5 or 2.6 installed. Limitations:  No context menus in the result pane.  Mailboxes can get temporary locked in some cases during indexing.  Some part of emails are not displayed in the preview pane (though everything gets indexed correctly).  Some Eudora attachments are not detected.  Text in the preview pane is generally not formatted correctly. Windows Desktop Search FireFox/Mozilla Add-in Description: Designed as a protocol handler, the Windows Desktop Search FireFox/Mozilla Add-in gives Windows Desktop Search the ability to search and index the content of your FireFox or Mozilla/Netscape mailboxes. Requirements:  Windows Desktop Search 2.5 or 2.6 installed. Limitations:  No context menus in the result pane.  Mailboxes can get temporary locked in some cases during indexing.  Some part of emails are not displayed in the preview pane (though everything gets indexed correctly).  Some FireFox attachments are not detected.  Text in the preview pane is generally not formatted correctly. SORTING OF THE RESULT LIST The ResultList of the Windows Desktop Search services allows to sort the results in different ways. This results view shows how the following options can be used: Sort the results by relevance. Sort the results by name. Sort the results by creation date. Sort the results by name and creation date. Show only the relevant results. Show only the recent results. Show only the unread results. Show only the moved results. Show only the results of an address list. Show only the results of an address book. Show only the results of a task list. Show only the results of a calendar. Show only the results of an appointment. Show only the results of a notes list. Show only the results of a journal. Show only the results of a task list. Show only the results of a task manager. Show only the results of a notes list. Show only the results of a journal. Show only the results of a calendar. Show only the results of an appointment.

## System Requirements:
